Professional Summary

Results-driven Full Stack Developer and BCA student (graduating June 2026) with hands-on internship experience building production-grade web applications. Proficient in the MERN stack (MongoDB, Express.js, React.js, Node.js), RESTful API design, and MVC architecture. Delivered 2+ end-to-end projects including a real-time billing system and a computer vision application. Adept at Git-based collaboration, agile development practices, and writing clean, maintainable code. Actively seeking SDE, Full Stack Developer, or Web Developer internship opportunities.

Education

Graphic Era University, Dehradun June 2023 – June 2026
Bachelor of Computer Applications (BCA)

Experience

Full Stack Development Intern May 2025 – jan 2026

Technology Business Incubator (TBI), Graphic Era University

- Built and deployed 3+ full-stack web applications using the MERN stack, contributing to all phases of the development lifecycle from design to deployment.
- Reduced average bug resolution time by ~30% through structured Git branching workflows and peer code reviews on GitHub.

Projects

SAPX Design – Full-Stack Web Application *Next.js, React, TypeScript, Claude AI API*

- Built a full-stack architecture business website with a custom CMS and messaging system.
- Developed a scalable backend using PostgreSQL and Supabase, enabling dynamic content management and secure data handling.
- Implemented responsive UI, SEO optimization, and admin-controlled website customization features.
- Live Demo: <https://sapxdesign.com/>

Web App Personalized AI Career Advisor *Next.js, React, TypeScript, Claude AI API*

- Built an AI-powered career advisory platform leveraging the Ikigai framework (passion, mission, vocation, profession) to generate personalized career path recommendations through natural language interaction.
- Designed and deployed a responsive, production-ready frontend using Next.js and Tailwind CSS, with live deployment on Vercel ensuring high availability and fast global load times.
- GitHub: github.com/priyanshugusain2004/personalized-ai-career-advisor-website
- Live Demo: v0-personalized-ai-career-advisor.vercel.app

Smart Light System using Hand Gesture Recognition *Python, OpenCV, MediaPipe, Tkinter*

- Developed a real-time computer vision system using OpenCV and MediaPipe to control smart bulb brightness via hand gestures, achieving gesture recognition latency under 100ms.
- Implemented human presence detection pipeline processing live webcam feed at 30 FPS, enabling automatic light on/off without physical interaction.
- GitHub: github.com/priyanshugusain2004/Smart_Light_System

Technical Skills

Languages: Python, C, C++, SQL ,JavaScript (ES6+)

Frontend: React.js, HTML5, CSS3, Responsive Design

Backend: Node.js, Express.js, Flask, REST API Development, MVC Architecture **Databases:** MongoDB, MySQL

Tools & Platforms: Git, GitHub, VS Code, Vercel, Render, Cisco Packet Tracer , Railway .

Languages

Hindi (Native) English (Professional Proficiency)
